BIF RIGHTS FOR PEOPLE WITH DISABILITIES

We believe that all people should enjoy certain rights. Because people with disabilities have consistently been denied the right to fully participate in society as free and equal members, it is important to state and affirm these rights. All people should be able to enjoy these rights, regardless of race, creed, color, sex, religion, or disability.

1. The right to live independent, active, and full lives.
2. The right to the equipment, assistance, and support services necessary for full productivity, provided in a way that promotes dignity and independence.
3. The right to an adequate income or wage, substantial enough to provide food, clothing, shelter, and the other necessities of life.
4. The right to accessible, integrated, convenient, safe and affordable housing.
5. The right to quality physical and mental health care.
6. The right to training and employment without prejudice or stereotype.
7. The right to accessible transportation and freedom of movement.
8. The right to bear or adopt and raise children and have a family.
9. The right to a free and appropriate public education.
10. The right to participate in and benefit from entertainment and recreation.
11. The right to equal access to and use all businesses, facilities, and activities in the community.
12. The right to communicate freely with all fellow citizens and those who provide services.
13. The right to a barrier free environment.
14. The right to a legal representation and full protection of all legal rights.
15. The right to determine one's own future and make one's own life choices.
16. The right to full access to all voting processes.

MEETING PEOPLE WITH DISABILITIES

It's okay to offer your help to someone...but ask first. Or wait for someone to ask you for help.

It's okay to ask people about their disabilities and it's okay for them not to talk about it.

Remember...just because people are using wheelchairs or crutches or just because they have a disability doesn't mean they are sick. Many people who have disabilities are healthy and strong.

When talking with people who use wheelchairs, sit down so they won't have to look up at you.

It's okay to use words like *see*, *hear*, *run* and *walk* when talking with people with disabilities.

Words like *cripple*, *gimp*, *retard*, *afflicted*, *patient*, *spastic*, *victim*, *wheelchair bound* or *suffering*, among others, are not used when referring to people with disabilities because they tend to be demeaning and promote negative perceptions.

It's okay to ask people who are deaf or people who have speech impairments to repeat what they say if you don't understand them the first time.

If a sign language interpreter is helping you speak with a person who is deaf, make sure to talk to the person, not the interpreter.

People who are blind hear as well as anybody, don't speak loudly when talking to them or other people with disabilities.

People with disabilities like to have fun. Think of ways to include them in activities with your friends or co-workers.

Canine companions, such as seeing eye dogs or service dogs, are on the job. Never pet or play with them because they can't be distracted from their work.

Do not park in the parking spaces designated for people with disabilities. They need them more than you do.

Treat a person with a disability the way you would like to be treated.
